JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

POPULAR CRAFTSMAN HOUSES

"WHERE can I see the Craftsman house designs?" In answer to this persistent demand, we are publishing each month some of the most popular Craftsman houses. This will be continued until we have reproduced the two hundred house designs which we have on file. A front elevation and floor plans will be shown on each page. We will furnish tentative estimates and cost of complete plans upon request. Address: Home Department, THE ART WORLD, 2 West 45th Street, New York City.

CRAFTSMAN
BUNGALOW
No. 90

BUILT OF
CEMENT ON
METAL LATH

THIS one-story bungalow is meant, of course, for a small family, as it has room for only two bedrooms, but the arrangement of the interior is so compact that the maximum of room is afforded within the space enclosed by the outer walls. The walls are of cement on metal lath, with a roof of rough red slate and ridges of tile. The low, broad, sturdy effect is heightened by the use of buttresses, which support the wide-eaved roof and give strength and dignity to the lines of the wall. This house also has ample window space. Two small recessed porches at one end of the house serve respectively as entrance porch and outdoor dining-room. A glass door leads from the entrance porch directly into the living-room.

The whole front of this room is taken up with the central group of windows and the casements set high on either side. A window-seat is built below the middle group, and bookcases occupy the remainder of the wall space to the height of the casements. On either side of the fireplace is an open cabinet for ornaments, curios and the like. The dining-room, as is nearly always the case in a Craftsman house, is really a recess in the living-

room. A sideboard occupies the whole of the outside wall, with three casement windows set high above it.

The arrangement of this cottage is such that the housemistress is practically independent of servants, for it would be an easy matter to take care of the house herself. As the servant problem is getting to be more of a vexed question each year, this is an important thing to be considered in the planning of a house. In fact, every Craftsman house is designed with this in view. The kitchen and pantry are as conveniently and compactly arranged as it is possible to manage, and the remainder of the house as simple and free from cumbersome and unnecessary features as a camp might be.

FLOOR PLAN

LIVING-ROOM IN BUNGALOW

It is really quite easy to secure these camp-like features in a house without at the same time sacrificing the beauty and home comfort which are so much to be desired, and it is of the utmost importance for the sake of every member of the household that this should be done.

CRAFTSMAN
EIGHT-ROOM
HOUSE
No. 139

TO BE BUILT
WHERE FIELD
STONE IS
PLENTIFUL

HOUSE NO. 139 is intended to be built in a locality where field stone is plentiful. The chimneys are rough red brick and the roof may be shingle, slate or flat tile. The balcony as well as the large round columns and pergola roof of the front entrance porch are of wood, and the porch floors are cement. The field stone extends as a parapet around the broad corner porch at the rear, and stone piers capped with flower boxes support the balcony.

This roomy porch is one of the most attractive features of the house, for it can be used in summer as an outdoor living-room, being sheltered by its balcony roof from the heat and open on two sides for refreshing breezes. In winter it may be closed in by a glass door and windows to make a sun-room, and as an open fireplace has been provided there, one can readily imagine what a delightful and friendly spot it would be.

The spirit of hospitality and comfort pervades the whole interior. On the left of the hall is the generous living-room, lighted by many groups of

MAY BE GLASSED IN

windows, provided with an open fireplace and opening onto the ample porch. On the opposite side of the house is the dining-room, which also has an inviting fireplace in one corner and windows overlooking the garden at the front and side.

On the second floor ample closets are provided for each bedroom and there is extra storage space beneath the roof above the first floor extension.
